**SCIENCE & LIVING IN GOD'S WORLD - GRADE 4**  
**WORKBOOK**

Dear Parents,

The purpose of this Workbook is to provide a guide for the student in the identification of the most important ideas and concepts covered in the text, Science and Living in God's World, Grade 4. The questions asked in the pages of this Workbook focus on the most significant ideas covered in the text and, as such, will prove invaluable in preparing for quarterly tests. In fact, the student should use the completed pages of this Workbook to aid in studying for the tests.

As you progress through both this Workbook and the Lesson Plan, you will find that the Workbook pages assigned in the Lesson Plan are not necessarily keyed to that day's lesson. In some cases, the material covered on a given day will not be included in the questions assigned from this Workbook until the next Science session listed in the Lesson Plan. When this occurs, it should be taken as an indication to the student that the material from the previous lesson warrants a thorough review before completing the assigned Workbook page. In all cases, the student should review even the most recently covered ideas and concepts prior to attempting the Workbook assignment.
